Yes. Sildenafil does require a prescription from your doctor. They can call, fax, mail, or send the prescription to us electronically.

Pricing varies widely among pharmacies. We are trying to save patients money by offering this medication at an affordable price.

There is no generic Cialis®. Viagra® is the only ED medication whose active ingredient is available in a generic alternative.

### WHY IS SILDENAFIL SO INEXPENSIVE?

A medication called Revatio® has come off patent and has generics available. It contains the same active ingredient as Viagra®, but in a different milligram strength.

You should call your doctor and request the medication. They may have questions before prescribing that we would be unable to answer. Your doctor can call, fax, mail, or electronically send the prescription directly to us.

Make sure your doctor writes for Sildenafil 20 mg tablets. If written for any strength of Viagra, we cannot use Sildenafil.

No. Because of patent laws, we can only fill Sildenafil prescriptions if your doctor writes the prescription for Sildenafil 20 mg.

Sildenafil is the only active ingredient in Viagra®. Brand name Viagra® comes in 25, 50 and 100 mg tablets. Sildenafil generic comes only in 20 mg tablets.

WILL MY INSURANCE PAY FOR SILDENAFIL?

Insurances almost never pay for Sildenafil for ED because it is an “off-label” use of the drug.

MY PRESCRIPTION IS FOR 50 BUT I ONLY WANT TO TRY 5 TO SEE IF IT WORKS. IS THE PRICE LESS THAN \$10?

The price varies by the number of tablets you receive. Fewer tablets will be more expensive per tablet. You can, however, always choose to fill a quantity LESS than prescribed.
